EDUCATION

Fudan University

Shanghai, China

Bachelor of Science in Computer Science

Sep. 2022 - June 2026 expected

- **GPA: 3.88/4.0, ranking: 3/91**

- **Relevant coursework:**

- * Selected courses with 4.0/4.0: Artificial Intelligence, Pattern Recognition and Machine Learning, Digital Image Process, Linear Algebra, Algebra Structure and Mathematical Logic, Fundamentals of Computation Theory, Algorithm Design and Analysis

PUBLICATIONS

MedVLSynther: Synthesizing High-Quality Visual Question Answering from Medical Documents with Generator-Verifier LMMs [arXiv]

*Xiaoke Huang**, ***Ningsen Wang****, *Hui Liu, Xianfeng Tang, Yuyin Zhou*
under review

RESEARCH EXPERIENCE

University of California, Santa Cruz

Aug. 2025 - Present

VLAA Lab

Advisor: Prof. Yuyin Zhou

- **Synthesizing High-Quality Visual Question Answering from Medical Documents with Generator-Verifier LMMs**

- * Present MedVLSynther, a transparent, open-weight generator-verifier pipeline that synthesizes high-quality, context-aware medical VQA from the open subset of PubMed literature.

Fudan University

July. 2024 - July. 2025

Digital Media Lab

Advisor: Prof. Bo Yan

- **A fine-grained alopecia areata recognition and scoring algorithm for the application of patent CN117994213A**

- * Collaborated with **Huashan Hospital, Fudan University** to develop this algorithm for the application of patent CN117994213A, **utilizing SAM and OpenCV for hair-level segmentation.**

- * The algorithm has been successfully applied to over **800** cases for quantitative scoring in clinical practice.

- **Constructing a comprehensive medical visual language reasoning benchmark integrating expert clinical knowledge.**

- * Using advanced medical classification models (such as MedXpert and RETFound) to extract Class Activation Maps (CAM) for identifying key local areas and **employing dedicated medical VLMs (HuatuoGPT Vision)** to generate local descriptions, building a Chain-of-Thought (CoT) framework. Modifying model's architecture to generate text-image interleaved CoT.

SKILLS

- **Programming Languages:** C, C++, Python
- **Deep Learning:** PyTorch, Transformers, vllm
- **LLM:** Transformers, vllm
- **RL:** R1-V, verl
- **Computer Vision:** OpenCV
- **Language:** TOEFL: 108 (R:30/L:25/S:26/W:27)

AWARDS

Huawei Scholarship at Fudan University(the First Prize)	Dec. 2023
Fudan University Excellent Student Scholarship(the Second Prize)	Nov. 2024
China Undergraduate Mathematical Contest in Modeling, Shanghai(the Third Prize)	Dec. 2024
